Grand Glass Sliding Shower Installation Guide

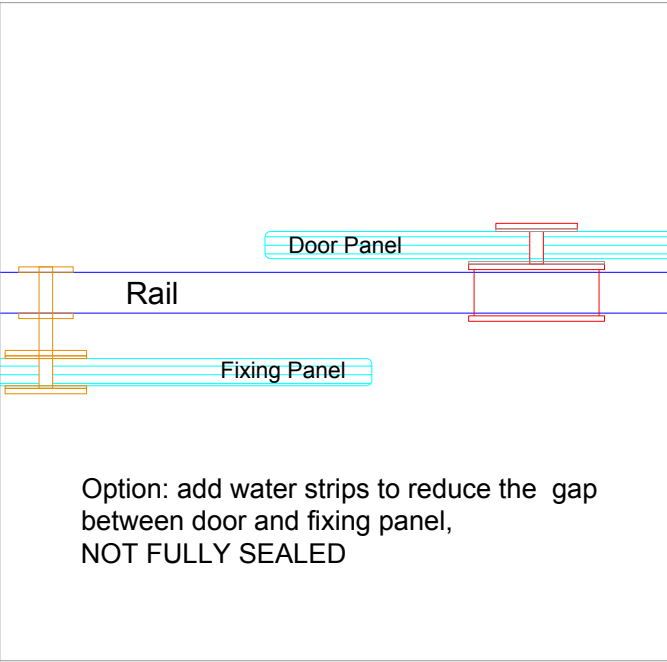

Complies with NZS3604:2011

Drawn By : SW	Date : 1/29/2025	Paper Size : A3
Checked By : JQ		Scale : NTS
Drawing No. : GGH-SS01		Rev. No. : 0
		Sht. No. : 1

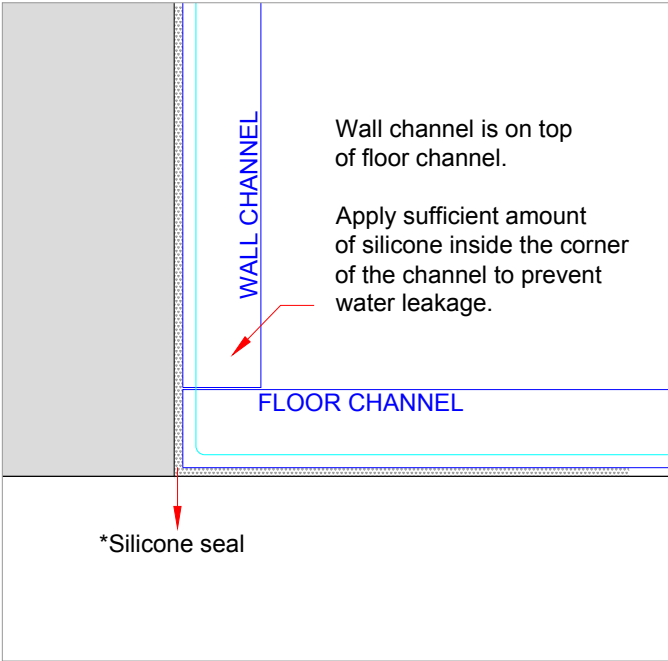

FIXING DETAIL (ALCOVE)

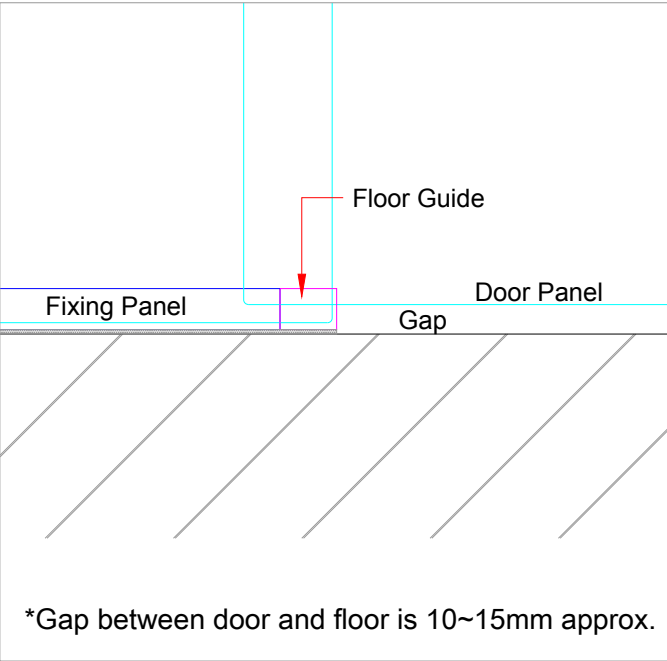

FIXING DETAIL a

FIXING DETAIL b

FIXING DETAIL d

FIXING DETAIL e

Important:

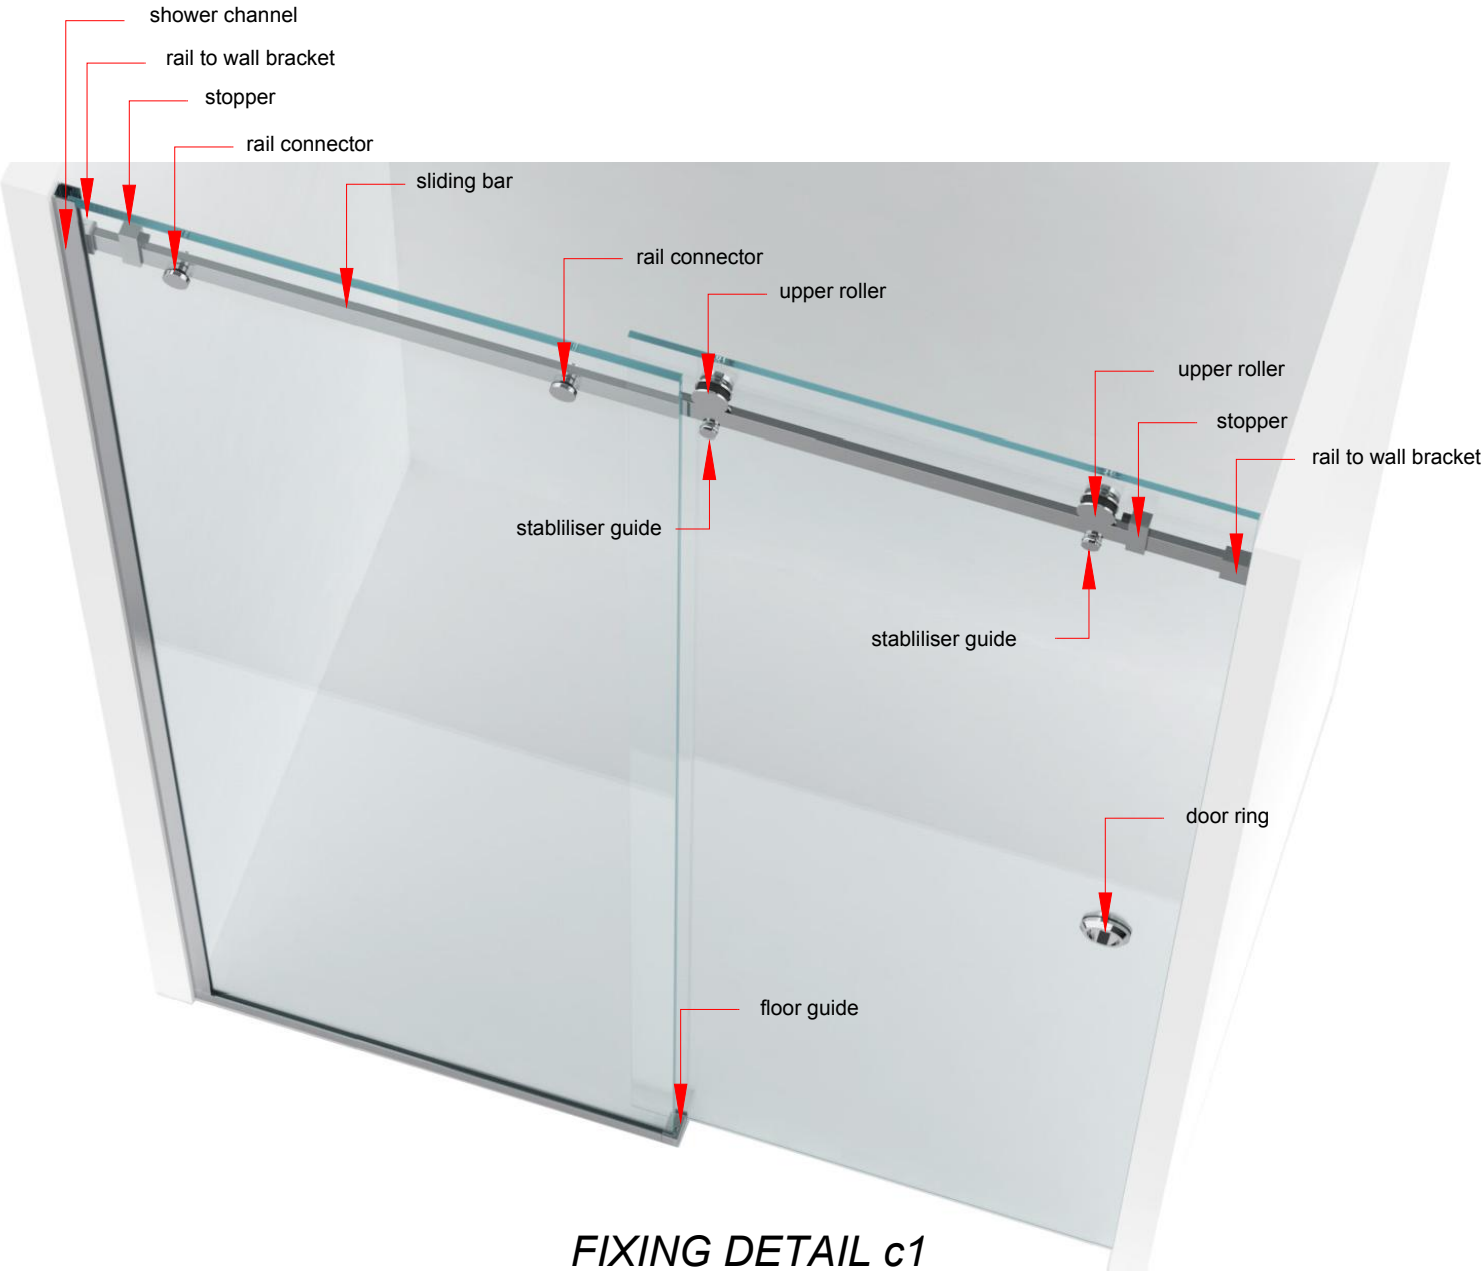

Before you install your project, please read this installation guide carefully, consider the gap between each part, calculate the exact length before cutting.

The corners and edges of toughened glass are its weakest points, so ensure they are well-protected during installation.

Always use rubber spacers to separate stainless steel hardware from the glass to avoid damage.

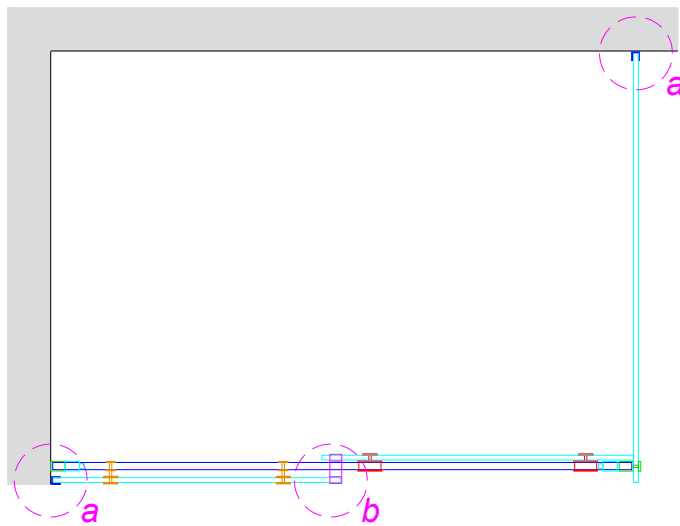

After completing the installation, it is essential to clean both the glass and the hardware. Proper cleaning of the glass helps maintain its protective coating, and cleaning the hardware removes any metal debris from the installation process, preventing potential rust.

Additionally, regular cleaning afterward is recommended to ensure long-term durability and maintain optimal performance.
